

Assignment 1: PDDL

Michal Štolba

stolba@agents.fel.cvut.cz

PUI (Planning in Artificial Intelligence)

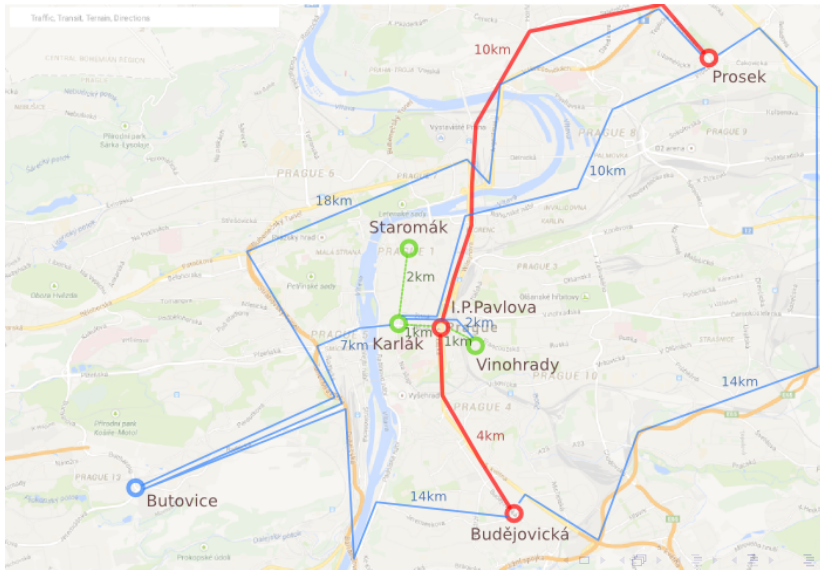

A City

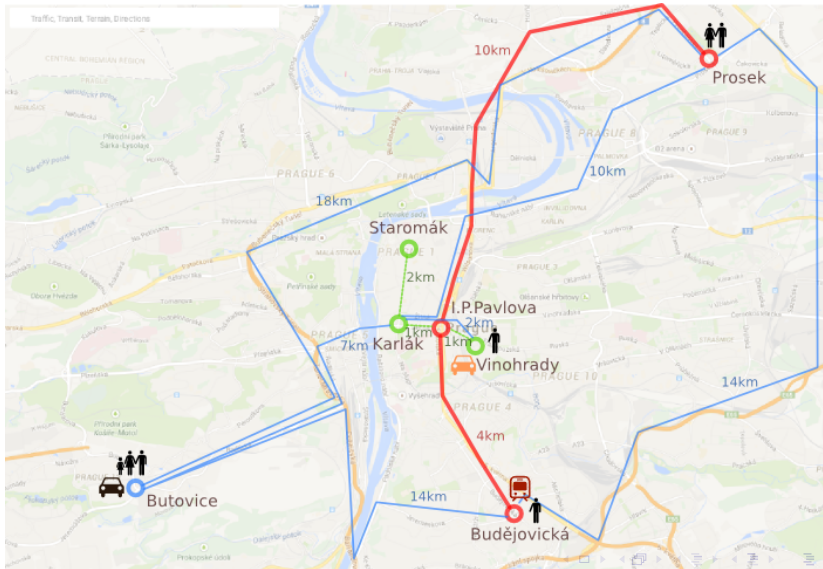

A City with Locations

A City with Transportation Graph

... and People

Sim-City

- ▶ Formalize the “simcity” problem
 - ▶ Each person lives somewhere and works somewhere
 - ▶ Some people may be related (family)
 - ▶ Goal: Find a “day activity and transportation plan” for a set of people
 - ▶ The people travel on a multi-modal transport graph using various vehicles
- ▶ <http://cw.fel.cvut.cz/wiki/courses/a4m36pah/assignments/assignment1>

Sim-City

- ▶ Formalize the “simcity” problem
 - ▶ Each person lives somewhere and works somewhere
 - ▶ Some people may be related (family)
 - ▶ Goal: Find a “day activity and transportation plan” for a set of people
 - ▶ The people travel on a multi-modal transport graph using various vehicles
- ▶ <http://cw.fel.cvut.cz/wiki/courses/a4m36pah/assignments/assignment1>

Sim-City

- ▶ Formalize the “simcity” problem
 - ▶ Each person lives somewhere and works somewhere
 - ▶ Some people may be related (family)
 - ▶ Goal: Find a “day activity and transportation plan” for a set of people
 - ▶ The people travel on a multi-modal transport graph using various vehicles
- ▶ <http://cw.fel.cvut.cz/wiki/courses/a4m36pah/assignments/assignment1>

Sim-City

- ▶ Formalize the “simcity” problem
 - ▶ Each person lives somewhere and works somewhere
 - ▶ Some people may be related (family)
 - ▶ Goal: Find a “day activity and transportation plan” for a set of people
 - ▶ The people travel on a multi-modal transport graph using various vehicles
- ▶ <http://cw.fel.cvut.cz/wiki/courses/a4m36pah/assignments/assignment1>

Sim-City

- ▶ Formalize the “simcity” problem
 - ▶ Each person lives somewhere and works somewhere
 - ▶ Some people may be related (family)
 - ▶ Goal: Find a “day activity and transportation plan” for a set of people
 - ▶ The people travel on a multi-modal transport graph using various vehicles

Sim-City

- ▶ Formalize the “simcity” problem
 - ▶ Each person lives somewhere and works somewhere
 - ▶ Some people may be related (family)
 - ▶ Goal: Find a “day activity and transportation plan” for a set of people
 - ▶ The people travel on a multi-modal transport graph using various vehicles
- ▶ <http://cw.fel.cvut.cz/wiki/courses/a4m36pah/assignments/assignment1>

Sim-City

Vehicles

- ▶ **Each vehicle needs a driver to operate**
 - ▶ (even public transport)
- ▶ Not all people can board all vehicles
 - ▶ (e.g. a family car)
- ▶ Driving a taxi or public transport counts as work

Sim-City

Vehicles

- ▶ Each vehicle needs a driver to operate
 - ▶ (even public transport)
- ▶ Not all people can board all vehicles
 - ▶ (e.g. a family car)
- ▶ Driving a taxi or public transport counts as work

Sim-City

Vehicles

- ▶ Each vehicle needs a driver to operate
 - ▶ (even public transport)
- ▶ Not all people can board all vehicles
 - ▶ (e.g. a family car)
- ▶ Driving a taxi or public transport counts as work

Sim-City

Vehicles

- ▶ Each vehicle needs a driver to operate
 - ▶ (even public transport)
- ▶ Not all people can board all vehicles
 - ▶ (e.g. a family car)
- ▶ Driving a taxi or public transport counts as work

Sim-City

Vehicles

- ▶ Each vehicle needs a driver to operate
 - ▶ (even public transport)
- ▶ Not all people can board all vehicles
 - ▶ (e.g. a family car)
- ▶ Driving a taxi or public transport counts as work

Sim-City

Domains and problems

- ▶ For each level (described later) create
 - ▶ Single domain file
 - ▶ Two problem files
 - ▶ Smaller problem (<10 nodes, <10 people and vehicles)
 - ▶ Larger problem (10-20 nodes, 10-20 people and vehicles)

Sim-City

Domains and problems

- ▶ For each level (described later) create
- ▶ Single domain file
- ▶ Two problem files
 - ▶ Smaller problem (<10 nodes, <10 people and vehicles)
 - ▶ Larger problem (10-20 nodes, 10-20 people and vehicles)

Sim-City

Domains and problems

- ▶ For each level (described later) create
- ▶ Single domain file
- ▶ Two problem files
 - ▶ Smaller problem (<10 nodes, <10 people and vehicles)
 - ▶ Larger problem (10-20 nodes, 10-20 people and vehicles)

Sim-City

Domains and problems

- ▶ For each level (described later) create
- ▶ Single domain file
- ▶ Two problem files
 - ▶ Smaller problem (<10 nodes, <10 people and vehicles)
 - ▶ Larger problem (10-20 nodes, 10-20 people and vehicles)

Sim-City

Domains and problems

- ▶ For each level (described later) create
- ▶ Single domain file
- ▶ Two problem files
 - ▶ Smaller problem (<10 nodes, <10 people and vehicles)
 - ▶ Larger problem (10-20 nodes, 10-20 people and vehicles)

Sim-City Level: Basic

Mandatory, 4 points

▶ Basic problem description

- ▶ Some walk-only edges
- ▶ At least one private transport type (e.g. cars)
- ▶ At least one public transport type (e.g. underground)
- ▶ At least one on-demand transport type (e.g. taxi)

Sim-City Level: Basic

Mandatory, 4 points

- ▶ Basic problem description
 - ▶ Some walk-only edges
 - ▶ At least one private transport type (e.g. cars)
 - ▶ At least one public transport type (e.g. underground)
 - ▶ At least one on-demand transport type (e.g. taxi)

Sim-City Level: Basic

Mandatory, 4 points

- ▶ Basic problem description
 - ▶ Some walk-only edges
 - ▶ At least one private transport type (e.g. cars)
 - ▶ At least one public transport type (e.g. underground)
 - ▶ At least one on-demand transport type (e.g. taxi)

Sim-City Level: Basic

Mandatory, 4 points

- ▶ Basic problem description
 - ▶ Some walk-only edges
 - ▶ At least one private transport type (e.g. cars)
 - ▶ At least one public transport type (e.g. underground)
 - ▶ At least one on-demand transport type (e.g. taxi)

Sim-City Level: Basic

Mandatory, 4 points

- ▶ Basic problem description
 - ▶ Some walk-only edges
 - ▶ At least one private transport type (e.g. cars)
 - ▶ At least one public transport type (e.g. underground)
 - ▶ At least one on-demand transport type (e.g. taxi)

Sim-City Level: Costs

2 points

▶ Add costs

- ▶ A cost of boarding a vehicle, a cost of riding a vehicle
 - ▶ Based on "real" distances
 - ▶ Not all vehicles have both
- ▶ Try additional type of cost
 - ▶ E.g. money, time, CO₂,
 - ▶ Can be in separate domain/problem files
 - ▶ + 1 points

Sim-City Level: Costs

2 points

- ▶ **Add costs**
 - ▶ A cost of boarding a vehicle, a cost of riding a vehicle
 - ▶ Based on “real” distances
 - ▶ Not all vehicles have both
 - ▶ Try additional type of cost
 - ▶ E.g. money, time, CO2,
 - ▶ Can be in separate domain/problem files
 - ▶ + 1 points

Sim-City Level: Costs

2 points

- ▶ **Add costs**
 - ▶ **A cost of boarding a vehicle, a cost of riding a vehicle**
 - ▶ Based on “real” distances
 - ▶ Not all vehicles have both
 - ▶ Try additional type of cost
 - ▶ E.g. money, time, CO2,
 - ▶ Can be in separate domain/problem files
 - ▶ + 1 points

Sim-City Level: Costs

2 points

▶ Add costs

- ▶ A cost of boarding a vehicle, a cost of riding a vehicle
 - ▶ Based on “real” distances
 - ▶ Not all vehicles have both
- ▶ Try additional type of cost
 - ▶ E.g. money, time, CO2,
 - ▶ Can be in separate domain/problem files
 - ▶ + 1 points

Sim-City Level: Costs

2 points

- ▶ Add costs
 - ▶ A cost of boarding a vehicle, a cost of riding a vehicle
 - ▶ Based on “real” distances
 - ▶ Not all vehicles have both
 - ▶ Try additional type of cost
 - ▶ E.g. money, time, CO2,
 - ▶ Can be in separate domain/problem files
 - ▶ + 1 points

Sim-City Level: Costs

2 points

- ▶ Add costs
 - ▶ A cost of boarding a vehicle, a cost of riding a vehicle
 - ▶ Based on “real” distances
 - ▶ Not all vehicles have both
 - ▶ Try additional type of cost
 - ▶ E.g. money, time, CO₂,
 - ▶ Can be in separate domain/problem files
 - ▶ + 1 points

Sim-City Level: Costs

2 points

- ▶ Add costs
 - ▶ A cost of boarding a vehicle, a cost of riding a vehicle
 - ▶ Based on “real” distances
 - ▶ Not all vehicles have both
 - ▶ Try additional type of cost
 - ▶ E.g. money, time, CO₂,
 - ▶ Can be in separate domain/problem files
 - ▶ + 1 points

Sim-City Level: Costs

2 points

- ▶ Add costs
 - ▶ A cost of boarding a vehicle, a cost of riding a vehicle
 - ▶ Based on “real” distances
 - ▶ Not all vehicles have both
 - ▶ Try additional type of cost
 - ▶ E.g. money, time, CO₂,
 - ▶ Can be in separate domain/problem files
 - ▶ + 1 points

Sim-City Level: Temporal

3 points

- ▶ Change actions to durative/temporal actions
 - ▶ At least the “drive” actions
 - ▶ You may use a smaller problem

Sim-City Level: Temporal

3 points

- ▶ Change actions to durative/temporal actions
 - ▶ At least the “drive” actions
 - ▶ You may use a smaller problem

Sim-City Level: Temporal

3 points

- ▶ Change actions to durative/temporal actions
 - ▶ At least the “drive” actions
 - ▶ You may use a smaller problem

Sim-City Level: Extended

max 2 extensions

- ▶ Add some of the following:
 - ▶ Capacity of vehicles (1-2 points)
 - ▶ using only STRIPS or using numeric fluents
 - ▶ e.g. car have only 4 seats
 - ▶ Leave vs. Park (1 point)
 - ▶ Difference between leaving a vehicle and parking it (at a parking place)
 - ▶ Fuel (1-2 points)
 - ▶ using only STRIPS or using numeric fluents
 - ▶ Come-up with your own (non-trivial) extension (1-3 points)

Sim-City Level: Extended

max 2 extensions

- ▶ Add some of the following:
 - ▶ Capacity of vehicles (1-2 points)
 - ▶ using only STRIPS or using numeric fluents
 - ▶ e.g. car have only 4 seats
 - ▶ Leave vs. Park (1 point)
 - ▶ Difference between leaving a vehicle and parking it (at a parking place)
 - ▶ Fuel (1-2 points)
 - ▶ using only STRIPS or using numeric fluents
 - ▶ Come-up with your own (non-trivial) extension (1-3 points)

Sim-City Level: Extended

max 2 extensions

- ▶ Add some of the following:

Your Task

- ▶ Formalize problem “Sim-City” in PDDL
 - ▶ Basic + chosen levels
- ▶ Evaluate
- ▶ Create PDF report

Your Task

Formalize problem “Sim-City” in PDDL

- ▶ For each Level:
 - ▶ 1x domain
 - ▶ 2x problem (small + large)
 - ▶ You may use the same problems (i.e., roadgraph, etc.) for all levels
 - ▶ Plan by at least one planner
 - ▶ Provide the output and the resulting plan
- ▶ Basic level is mandatory!

Your Task

Formalize problem “Sim-City” in PDDL

- ▶ For each Level:
 - ▶ 1x domain
 - ▶ 2x problem (small + large)
 - ▶ You may use the same problems (i.e., roadgraph, etc.) for all levels

 - ▶ Plan by at least one planner
 - ▶ Provide the output and the resulting plan
- ▶ Basic level is mandatory!

Your Task

Evaluate (+ 2 points)

- ▶ **Select 3 of the provided planners**
 - ▶ One should be optimal: fd-ms, fd-lmcut or symba
- ▶ Run all planners on both problems of the selected domain
- ▶ Plot comparison of the planners
 - ▶ Time dependent on problem
 - ▶ Quality dependent on problem
- ▶ Include in the report

Your Task

Evaluate (+ 2 points)

- ▶ **Select 3 of the provided planners**
 - ▶ One should be optimal: fd-ms, fd-lmcut or symba

- ▶ Plot comparison of the planners
 - ▶ Time dependent on problem
 - ▶ Quality dependent on problem
- ▶ Include in the report

Your Task

Create PDF report

- ▶ (Ideally in \LaTeX)
- ▶ Description of the location, transport graph, people, vehicles (brief)
- ▶ Specify which problem levels and features were formalized (and how)
 - ▶ Specify your own enhancements in-detail
- ▶ Brief description of (all) used predicates, actions and functions
- ▶ List of the selected planners, parameters of the testing env.
- ▶ (Execution time and solution quality plots)
- ▶ Conclusion
