A0B17MTB

- 13 weeks (14th week is a ‘reserve’)
 - 11 blocks with new theory, 1 block of bonuses, 1 block of examples
- **conditions of credit award:**
 - to hand in a project (next-to-last week of the semester, 60 points)
 - **competition assignment** (see next slide)
 - to pass a test, 20 points (min. 50%, next-to-last week)
 - on top of that two short tests during semester, 20 points (min. 10 points are needed)
 - 3 bonus examples during the semester, 6 bonus points
 - max. 2 missed classes (more absences only after prior arrangement)
 - any lecture can be substituted
- could happen that not all of the stuff of the course will be presented, because of time constraint – understanding the basics is a priority
 - bonus stuff (slides) available for advanced students

A0B17MTB – Principles

- the aim of the course is to teach you something – if the presentation is to fast, be heard
- if you have an idea / proposal how to solve a problem in a more efficient way, put it forward
- can happen that the lecturer is not able to answer your question immediately, in that case the answer will be provided during the next lecture

You will be able to ...

- see the [previous students' projects](#)
