Introduction to MATLAB

■ Usage

- Signal processing, image processing, testing and measurement, financial modelling and analysis, computational biology,...

■ Expansions of MATLAB

- Toolboxes for specific applications
- E.g. Image Processing Toolbox, Image Acquisition Toolbox, Video and Image Processing Blockset, Statistics Toolbox, Wavelet Toolbox, ...

Matlab - functions

ČVUT
v Praze
in Prague

■ Function list

- <http://www.mathworks.com/help/matlab/functionlist.html>

■ Tutorial

- http://www.mathworks.com/help/pdf_doc/matlab/getstart.pdf

Image Processing Toolbox

ČVUT

v Praze

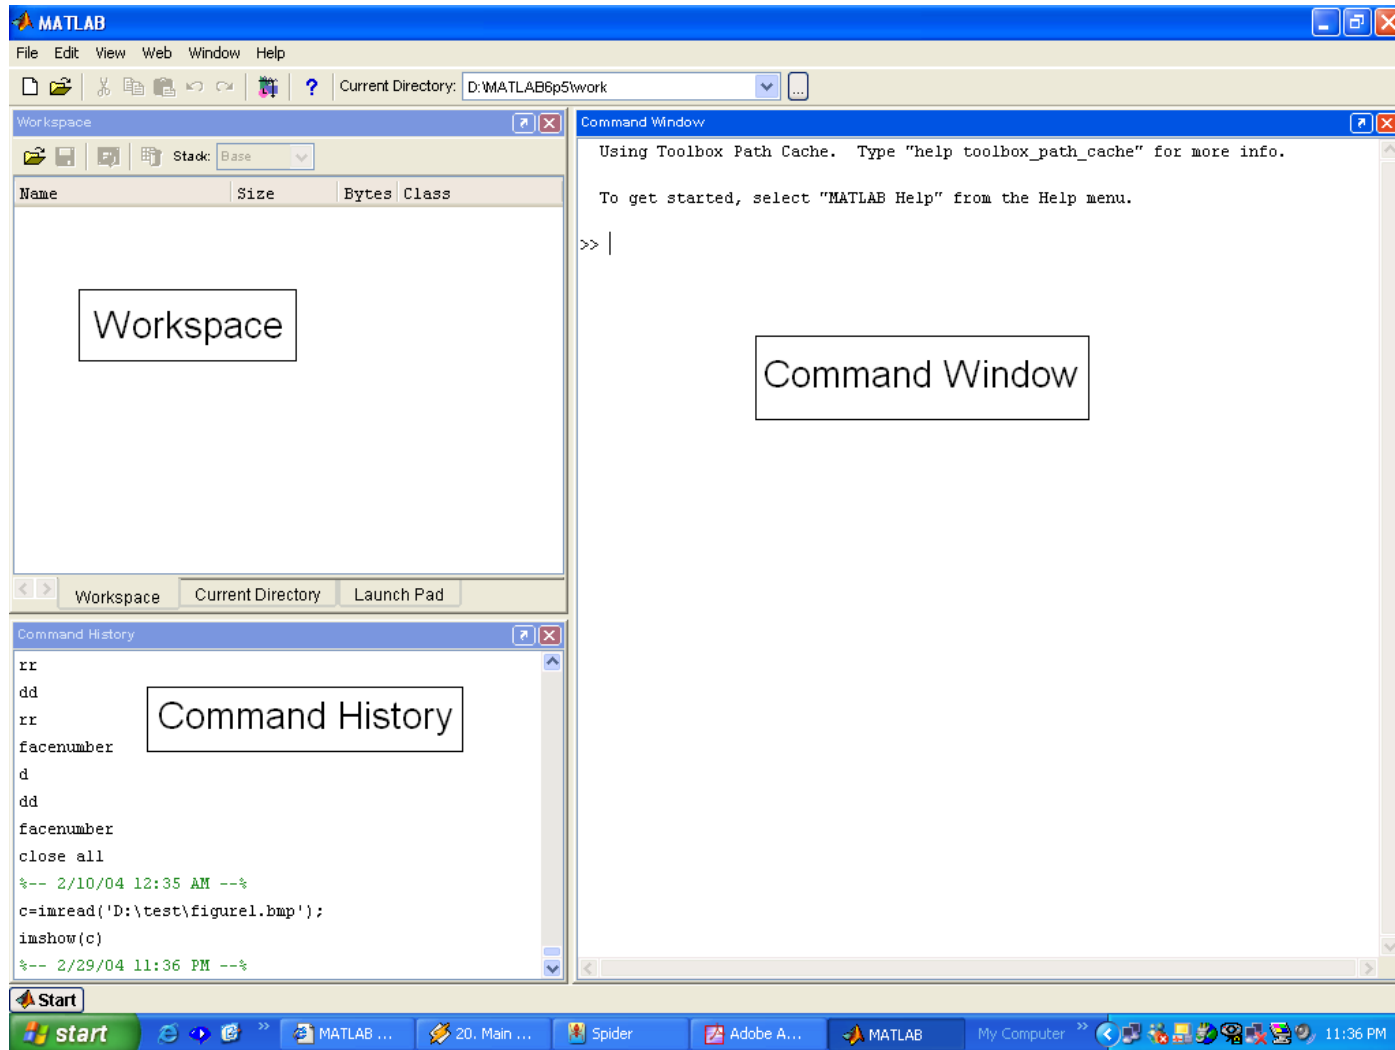

in Prague

- Image analysis
 - Segmentation, Morphology, Feature extraction, Edge detection, ...
- Image processing
 - Contrast enhancement, color space conversion, ...
- FFT, DCT
- ...

MATLAB - environment

ČVUT
v Praze
in Prague

- Command window
 - Typing commands, outputs, errors
- Workspace
 - Variables, their values and types
- Command history
 - Used commands can be “drag and drop” to the command window

Command window

ČVUT
v Praze
in Prague

- $3 + 4 - 7$
- $t = 3 + 4 - 7$
- $k = 3 + 4 - 7;$
- k
- $k;$
- $3^2 * 4$
- $2 + 2 / 1 + 1$

Command window

ČVUT
v Praze
in Prague

- $1/0$ (Inf)
- $0/0$ (NaN)
- **MATLAB is Case Sensitive!**
- K and k are different variables

Command window

ČVUT
v Praze
in Prague

- MATLAB has a lot of built-in functions
 - sin, cos, tan, asin, acos
 - sin(pi/2)
 - log, log10, log2
 - log10(100)

- Do not overwrite built-in functions/variables
 - exist name

Vectors in MATLAB

ČVUT

v Praze

in Prague

- $v = [1, 2, 3, 4]$
- $v = [1\ 2\ 3\ 4]$
- $v = [1; 2; 3; 4]$
- $v = \text{start: step: end}$
- $v = 2:2:9$
 - $v = [2, 4, 6, 8]$
- $v = 2:5$
 - $v = [2, 3, 4, 5]$
- $v = \text{linspace}(1, 5, 10)$
- $v(4) = 0$
- $v(5:7) = 0$
- $v(1:2:7) = 0$

Matrices in MATLAB

ČVUT
v Praze
in Prague

- $A = [1 \ 2 \ 3; 4 \ 5 \ 6; 7 \ 8 \ 9]$

- `access(row, column)`

```
>> A(2,1)
```

```
ans = 4
```

- `: full row/column`

```
>> A(:,2)
```

```
ans =
```

```
2
```

```
5
```

```
8
```

- `Interval`

```
>> A(1:2,2)
```

```
ans =
```

```
2
```

```
5
```

A =

1	2	3
4	5	6
7	8	9

Operations

ČVUT

v Praze
in Prague

- Matrix
 - $+$, $-$, $*$, $/$, $^$, sqrt , sin , cos , ...
- Element-wise operations
 - .* , ./ , .^
- `size(A)`
- `sum(A)`, `sum(A,1)` – sum of columns
- `sum(A,2)` / sum of rows
- `sum(sum(A))` – sum of all items
- `sum(A(:))`

Operations

ČVUT
v Praze
in Prague

- >> A+A

```
ans =  2  4  6
      8 10 12
      14 16 18
```

- >> A*A

```
ans =  30  36  42
      66  81  96
      102 126 150
```

- >> A.*A

```
ans =  1  4  9
      16 25 36
      49 64 81
```

Timing

ČVUT
v Praze
in Prague

- `tic; commands; toc;`
- In seconds
- In m-files

```
t0 = cputime
```

```
Commands
```

```
t1 = cputime
```

```
fprintf('duration %g', t1-t0)
```

Variable preallocation

ČVUT
v Praze
in Prague

```
tic
x = 0;
for k = 2:10000000
    x(k) = x(k-1) + 5;
end
toc
```

```
tic
x = zeros(1, 10000000);
for k = 2:10000000
    x(k) = x(k-1) + 5;
end
toc
```

MATLAB specific commands

ČVUT
v Praze
in Prague

- We want to create array:

$$v(p) = \frac{p}{\sin(p) + 2}$$

- 1:

```
tic
for p = 1:100000
v(p) = (p/sin(p)+2); end
toc
```

- 2:

```
tic
v = zeros (1, 100000);
for p = 1:100000
v(p) = (p/sin(p)+2); end
toc
```

- 3:

```
tic
p = 1:100000;
v = (p./sin(p)+2);
toc
```

How to combine 2 images?

How to combine 2 images?

A a B size (540*380),

```
apple = imread('apple.jpg');  
orange = imread('orange.jpg');
```

Brute force

```
% measure performance using stopwatch timer  
tic  
for i = 1 : size(apple, 1)  
    for j = 1 : size(apple, 2)  
        for k = 1 : size(apple, 3)  
            output(i, j, k) = (apple(i, j, k) +  
orange(i, j, k))/2;  
        end  
    end  
end  
end  
toc
```

What is the time of the operation?

A a B size(540*380)

```
apple = imread('apple.jpg');  
orange = imread('orange.jpg');
```

Approach by using matrices

```
tic  
    % measure performance using stopwatch timer  
    output = (apple + orange)/2;  
toc
```

? time

Performance optimization

ČVUT
v Praze
in Prague

- Fast operations with vectors and matrixes
- Slow cycles

- How to improve the code:
 - <http://www.mathworks.com/support/tech-notes/1100/1109.html>

Useful shortcuts

ČVUT

v Praze
