

Industry day NIFTi

On behalf of the consortium of the European project NIFTi, TNO would like to invite you to the industry day of NIFTi on June 28.

NIFTi focuses on developing autonomous robots that can work together with humans as a team in disaster management, to make a situational assessment and initiate recovery of a disaster site. Throughout this development, NIFTi works closely together with end user organizations from different countries. The NIFTi systems are designed, tested, and evaluated to work with humans under realistic operational conditions. The project has received 3 scores of excellence from the review committee in the 3 previous years.

On the Industry Day we show recent project achievements in a variety of live demonstrations and presentations. This day provides an excellent opportunity to discuss (near) future developments and applications with relevant stakeholders

The Industry Day is held at the training center of the Fire Department of Amsterdam-Amstelland Schiphol, on Friday June 28 2013.

TNO innovation
for life

For questions or registering please send an email to: nifti@tno.nl

DFKI GmbH, TNO, Fraunhofer IAIS, BlueBotics SA, ETH Zürich, Czech Technical University, Università La Sapienza, the Fire Department of Dortmund, and Vigili del Fuoco

www.nifti.eu

Provisional program:

- 1000h Welcome
- 1030h Live demonstration
- 1100h Poster presentations and platform demonstration
- 1200h Lunch
- 1300h Outlook TRADR and closing words
- 1345h Live demonstrations for press
- 1445h End

Location:

BOCAS

Sloterweg 527

1171 VG Badhoevedorp
