

## **Conceptual modelling in OWL**

7th tutorial

Ontologies and Semantic Web

Michal Med

michal.med@fel.cvut.cz

### **Crash course Protége**

- Ontology editor supporting OWL
- Download from <a href="http://protege.stanford.edu/">http://protege.stanford.edu/</a> and install
- Install Pellet Reasoner plug-in (info about reasoner here: <u>https://github.com/stardog-union/pellet</u>)
- Go to Preferences → Plugins and change the Plugin registry to
   <u>https://raw.githubusercontent.com/Complexible/pellet/master/protege/plugin/plugins.repo</u>
   <u>sitory</u>. You will need to restart Protege before the repository change is taken into account (a Protege bug).

### What is OWL?

https://www.w3.org/TR/owl2-primer/

Ontology language for Semantic Web. Provides **classes**, **properties**, **individuals and data values**. Can be combined with RDF information.

Supports description logics.

# **Description logics in OWL - terminology**

DL	OWL
concept	class
role	Object property
Constant/individual	individual
theory	ontology
axiom	axiom

#### **Description logics in OWL - Manchester syntax**

description logics syntax	Manchester syntax (OWL in Protégé)
$C_1 \sqsubseteq C_2$	$C_1$ SubClassOf $C_2$
$C_1 \equiv C_2$	$C_1$ Equivalent To $C_2$
$C_1 \sqsubseteq \neg C_2$	$C_1$ <b>DisjointWith</b> $C_2$
$R_1 \sqsubseteq R_2$	$R_1$ SubPropertyOf $R_2$
$\neg C$	not $C$
$C_1 \sqcup C_2$	$C_1$ or $C_2$
$C_1 \sqcap C_2$	$C_1$ and $C_2$
$\exists R \cdot C$	R some $C$
$\forall R \cdot C$	R only $C$
$\exists R \cdot \{i\}$	$R$ value $\{i\}$
$(\geq 2 R C)$	$R \min 2 C$
$(\leq 2 R C)$	$R \max 2 C$
$R^{-}$	inverse $R$
