

Some R technical issue in assignment 4:

> If you have a wrong version of deldir library, you may get an error:

```
Error in eval(ccc) : object 'voronoi' not found
```

> You can solve it by changing (<<- is double <, global variable):

```
voronoi <- deldir(X[,1], X[,2])
```

to

```
voronoi <<- deldir(X[,1], X[,2])
```
