The new series of BTL whirlpools combines clean, elegant shapes with high-quality materials and perfect workmanship. The word "simplicity" best characterizes their design and operation. The unique features, such as the colour touch screen user-interface or the one-touch start of therapy programmes make operation extremely fast and easy. A soft blue glow gently highlights the exterior base of the baths. The baths are designed for all kinds of professional facilities. The series consists of luxurious baths for wellness centres, total-immersion whirlpools in two sizes and baths for upper and lower limbs.
