1 Graph Isomorphism

2 Tree Certificates

Outline

1 Graph Isomorphism

2 Tree Certificates

Example 1

Find the function of the two following graphs isomorphism.

Example 2

Find the function of the two following graphs isomorphism.

Example 3

Find the function of the two following graphs isomorphism.

Example 4

Find the function of the two following graphs isomorphism.

Outline

1 Graph Isomorphism

2 Tree Certificates

Example 5

Create the certification for the following tree

Example 6

Create the certification for the following tree

Example 7

Create the certification for the following tree

Example 8

Create the certification for the following tree

Example 9

A tree certificate is given. Explain how we determine the number of the tree leaves although we do not reconstruct the tree.

Example 10

A tree certificate is given. Explain how we determine the maximum node degree of the tree although we do not reconstruct the tree.

Example 11

Reconstruct a tree from its certificate

- 1 0011
- 2 000101100101011
- 3 00010110010110010111
- 4 00001100010111110010001011111
