Teachers	Course Organization and Evaluation
	B3B36PRG – Programming in C; Completion: Z,ZK; Credits: 6
RNDr. Ingrid Nagyová, Ph.D.	 Z - ungraded assessment, ZK - exam 1 ECTS credit is about 25–30 hours per semester, six credits is about 180 hours per semester Contact part (lecture and labs): 3 hours per week, i.e., 42 hours in the total Exam including preparation: 10 hours Home preparation (first book reading and followed by homeworks) approx 9 hours per week Median load
MSc. Yuliia Prokop, Ph.D.	 Ongoing work during the semester
	 Homeworks mandatory, optional, and bonus parts Someetical preject multi thread computational applications
Ing. Martin Zoula	 Semestral project – multi-thread computational applications. Exam test and implementation exam – verification of the acquired knowledge and skills from the teaching part of the semester. An independent work with the computer in the lab (class room).
	 Attendance to labs, submission of homeworks, and semestral project.
	 Consultation - If you do not know, or spent too much time with the homework, consult with the instructor/lecturer.
	 Maximize the contact time during labs and lectures, ask questions, and discuss.

Lectures – Spring Semester Academic Year 2024/2024	Resources and Literature
	Textbook
Schedule for the academic year 2023/2024.	"C Programming: A Modern Approach" (King, 2008)
https://intranet.fel.cvut.cz/cz/education/harmonogram.html Lectures: Dejvice, Lecture Hall No. T2:D3-209, Tuesday, 16:15-17:45.	C Programming: A Modern Approach, 2nd Edition, K. N. King, W. W. Norton & Company, 2008, ISBN 860-1406428577
14 teaching weeks - (19.226.5.2024); 13 weeks in practice.	The main course textbook
 National holiday – 01.04.2024 (Monday). National holiday – 01.05.2024 (Wednesday). National holiday – 08.05.2024 (Wednesday). 	During the first weeks, take your time and read the book! The first homework deadline is 16.03.2024.
 Rector's day – 14.05.2023 (Tuesday). Thursday 09.05.2024 – classes as on Wednesday (odd teaching week). 	 Lectures – support for the textbook, slides, comments, and your notes. Demonstration source codes are provided as a part of the lecture materials!
	Laboratory exercises – gain practical skills by doing homeworks (yourself).

 Organization Course Goals Means of Achieving the Course Goals Means of Achieving the Course Goals Means of Achieving the Course Goals Evaluation and Exam Communication Tools and Academic Network Services Organization Course Goals Means of Achieving the Course Goal		Jan Faigl, 2024 B3B36PRG – Course Organization: Programming in C 16 / 32
Jan Faigl, 2024B3B36PRG - Course Organization: Programming in C18 / 32Jan Faigl, 2024B3B36PRG - Course Organization: Programming in C19 / 32	 Teaching Programming in B3B36PRG Our aim is to build your experience and develop your programming skills. Programming vs. algorithmization; Programming is the "craft" of how to implement an algorithm correctly. Functional is not enough - the program must be correct tool Expected input vs. what the user can input. The learning load is therefore spread over the course of the semester. Practice assignments and homework deadlines. Systematic development of programming skills throughout the semester is essential. <i>Typically, there is time at the beginning of the semester to understand the principles (reading the textbook)!</i> Without knowing the constructs and basic commands, you cannot program effectively. Know and know how to use (not "stick"). Dependence on whisperer or Co-pilot! Starting with relatively simple tasks to learn programming constructs and how to organize source code. Code clarity and the ability to navigate code efficiently! The assignments can always be implemented based on the topics covered the lectures/labs. Solutions with more advanced constructs may be more elegant(shorter), but may not provide the necessary insight. In the first lectures we cover the necessary knowledge, which is further deepened. Exercises complement the lectures and give more space for practical learning. You can choose a practical way of absorbing programming knowledge from examples, which is 	 Overview of the Lectures 1. Course information, Introduction to C programming K. N. King: chapters 1, 2, and 3 2. Writing your program in C, control structures (loops), expressions K. N. King: chapters 4, 5, 6, and 20 3. Data types, arrays, pointer, memory storage classes, function call K. N. King: chapters 7, 8, 9, 10, 11, and 18 4. Data types: arrays, strings, and pointers K. N. King: chapters 7, 8, 9, 10, 11, and 18 4. Data types: struct, Union, Enum, Bit fields. Preprocessor and Large Programs K. N. King: chapters 8, 11, 12, 13, and 17 5. Data types: Struct, Union, Enum, Bit fields. Preprocessor and Large Programs K. N. King: chapters 10, 14, 15, 16, and 20 6. Input/Output – reading/writting from/to files and other communication channels, Standard C library – selected functions K. N. King: chapters 21, 22, 23, 24, 26, and 27 7. Parallel and multi-thread programming – methods and synchronizations primitives 8. Multi-thread application models, POSIX threads and C11 threads 9. C programming language wrap up, examples such as linked lists 10. Accuracy and Speed of Calculation 11. ANSI C, C99, C11 and differences between C and C++ Introduction to C++. 12. Quick introduction to C++ Reserve (Rector's day) 13. Resource Ownership in C++ All supporting materials for the lectures are available at https://cw.fel.cvut.cz/wiki/courses/b3b36prg/start

Organization Course Goals Means of Achieving the Course Goals Evaluation and Exam Communication Tools and Academic Network Services	Organization Course Goals Means of Achieving the Course Goals Evaluation and Exam Communication Tools and Academic Network Services	
Homework and Other tasks	Homeworks	
Independent work to gain practical experience.	1+7 homeworks - seven for the workstation.	
 Assignment at the lectures and defined submission date. All assignments are defined. 	I+7 NOMEWORKS - Seven for the WorkStation. https://cw.fel.cvut.cz/wiki/courses/b3b36prg/hw/start	
 Submission of homework through BRUTE. 	1. HW 00 – Testing (1 point) 1 h	
https://cw.felk.cvut.cz/brute	2. HW 01 – ASCII Art (2 points) 3 h	
 Uploading the archive with the necessary source files. 	Coding style penalization – up to -100% from the gain points.	
 Verify the correctness of the implementation with automated tests. 	3. HW 02 – Prime Factorization (2 points + 4 points bonus) Coding style $4h + 4h$ (bonus)	
Penalties for exceeding the number of uploads.	4. HW 03 – Caesar Cipher (2 points + 2 points bonus) Coding style $3 h + 3 h$ (bonus)	
Submit correct codes, not "only" code that passes tests!	5. HW 04 – Text Search (2 points + 3 points optional) 5 h	
Plagiarism detection The aim of solving the problems is to get your own experience!	6. HW 05 – Matrix Calculator (2 points + 3 points optional + 4 points bonus) Coding style! 6 h + 5 h (bonus)	
Tasks are designed to be achievable. Plan and keep track of time, consult early.	7. HW 06 - Circular Buffer (2 points + 2 points optional)5 h	
Independent work and mastery of techniques and knowledge is the key to successful	8. HW 07 – Linked List Queue with Priorities (2 pts + 2 pts optional) 7 h	
completion of the course.	All homeworks must be submitted to award an ungraded assessment Total about 42–47 hours. Late submission is penalized!	
Continuous work and problem solving!	 Coding style needs to be learn, penalization is to motivate you thinking about it and learn the craft of coding. 	
If you do not understand something, ask! If you make mittake you have a final of the mittake way already knowledge.	If you improve over the semester, penalization can be compensated at the end.	
If you make mistakes you learn, if you do not make mistakes you already know! Jan Faigl, 2024 B3B36PRG – Course Organization: Programming in C 20 / 32	Jan Faigl, 2024 B3B36PRG – Course Organization: Programming in C 21 / 32

Organization Course Goals Means of Achieving the Course Goals Evaluation and Exam Communication Tools and Academic Network Services Organization Course

Tasks and **BRUTE**

- Tasks are not just about submitting an implementation that passes the BRUTE tests.
 - The goal is not to submit tasks in BRUTE, it to verify the program functionality.
 - BRUTE is a tool to continuously check progress and gain knowledge.
 - The goal is to learn to **independently program** functional programs correctly.
- Tasks are all about gaining gradual experience with specific constructs.
 - All of the task assignments have been implemented many times, and even generative AI can do it. In this course you have the opportunity to understand C programming through your own implementation of assignments. The task successful submission is a means to reach thegoal, not the goal itself.
- Tasks are very similar in relative difficulty. It is important to solve the tasks independently and to learn the sub-skills.
 Absolutely, the tasks get progressively more and more difficult!
- Rather than struggling too long by your own, ask (on Discord), for practice or consultation.
- Tasks HW01–HW03 and HW05 are checked for correctness and clarity of code.

Grade Points Mark

 \geq 90

80-89

70-79

60 - 69

50 - 59

< 50

- Focused on consistency, readability, and modularity (splitting into functions). In terms of training and learning, try to split even a seemingly trivial program into multiple functions.
- The motivation is not to spend too much time implementing without significant progress.

Course Evaluation

Point Source	Maximum Points	Required Minimum Points
Assignment	25	All assignments must be turned in.
Bonus Assignment	10	- 25
Labs (MCU)	6	-
Semester project	30	' 10
Exam test	20	† 10
Implementation exam	20	10
Total	111	55

[†] If you fail the implementation and score exam test for 13 or more points, the following exam term is only for the implementation, and vice versa, if you do not ask otherwise. 55 points is solid E, not borderline, but solid. The exam test (and implementation) is not corrected but evaluated, the scoring is upper bound, i.e., it might contain less points than evaluated.

- The course can be passed with **ungraded assessment** and **exam**.
- All homeworks must be submitted and they have to pass the mandatory assessment.

n Faigl, 2024	B3B36PRG – Course Organization: Programming in C	24 / 32	Jan Faigl, 2024	B3B36PRG – Course Organization: Programming in C	26 / 32
		a 1			a .

Communicating Any Issues Related to the Course

- Ask the lab teacher or the lecturer.
- Use e-mail for communication.
 - Use your faculty e-mail.
 - Put PRG or B3B36PRG to the subject of your message.
 - Send copy (Cc) to lecturer/teacher.
- Discord channel.

Expected results

Jan Faigl, 2024

Grading Scale

- Timely submission of all homework with required and optional assignments (35 points).
- Semestral project (20 points) and bonus assignments (5–10 points).
- Exam test (15+ points).
- Exam implementation (20 points).
- **95**+ **points** and more (A Excellent) with small imperfection.
